COLLABORATIVE METHODS
A MONTHLY NEWSLETTER

Dear [member_name_first],

Welcome to our February 2010 edition. This monthly newsletter showcases design solutions that The Schimberg Group provides to its clients.

The Schimberg Group understands that collaboration is fundamental towards achieving best practices, sustainable success and **Extraordinary Results**.

President's Corner:

You Light Up My Life

Lighting design as it applies to the built environment, also known as 'architectural lighting design', is both a science and an art. Comprehensive lighting design requires consideration of the amount of functional light provided, the energy consumed, as well as the aesthetic impact supplied by the lighting system.

- Lighting from Wikipedia

Architectural success is impacted by the opportunities that lighting provides to the interior and exterior of spaces and buildings. With the increase in more sustainable and energy efficient options, an architect can alter the feel of the space while increasing the light's use and lowering the maintenance requirements. With new technology, incandescent bulbs can be replaced with LED bulbs or compact fluorescents and warm or cool colors can be applied appropriately to enhance any space.
